Product Description

50' NIFTY LIFT TOWABLE / 2" Ball

With one of the largest working envelopes in its class, the Nifty TM50 towable cherry picker delivers maximum reach with stability and control.

Octagonal boom sections provide the TM50 strength without compromising on weight and the telescopic upper boom improves accuracy when positioning the platform.

Fully proportional hydraulic outriggers make setting up and levelling the TM50 quick and easy even on gradients.

The TM50's outstanding reach makes it ideal for a wide range of applications.

The TM50 is also available with a traction drive option that offers a simple, cost-effective and safe method for on-site positioning.
