Product Description

LADDER 32' EXTENTION WERNER

The T6232-2GS GLIDESAFE™ Fiberglass Extension Ladder was built with safety in mind. Featuring Lift Assist Technology which makes it up to 50% easier to extend versus a traditional extension ladder, eliminating back and arm strain. Built-in lowering assist helps to ensure a smooth, easy descent preventing slamming and rope burns. GLIDESAFE™ features a dual locking system to help prevent ladder extension during transport. Non-conductive rails makes this ladder ideal for working near electricity. With a duty rating of 300 lbs., the ladder is durable and long-lasting. The exclusive Alflo rung joint means Twist-Proof performance on the job. The Traction-tread tri rungs are slip-resistant and the side rails are interlocking. The dual action feet are for use on hard or penetrable surfaces and swivel easily. The durable rail shield bracket and shoe help protect the bottom of the rail. The fly section rails are pre-pierced at the top for easy field installation of accessories.

Lift Assist Technology makes it up to 50% easier to extend versus a traditional extension ladder, eliminating back and arm strain

Built-in lowering assist helps to ensure a smooth, easy descent preventing slamming and rope burns

GLIDESAFE™ features a dual locking system to help prevent ladder extension during transport

Exclusive Alflo® rung joint means Twist-Proof® performance

Smooth operating pulley with polypropylene rope
