Product Description

LADDER 20' EXTENTION WERNER

The 20ft AERO Lightweight Fiberglass Extension Ladder Model B7120-2 boasts a duty rating of 375lb and features exclusive BOXLOK™ Interlocking rail technology. The patented box rail design provides the ultimate climbing experience reducing bounce, twist, and side sway compared to other lightweight ladders on the market. The AERO Lightweight Extension Ladder is 25% lighter than our standard 375lb rated ladder increasing productivity and reducing fatigue. The Traction-Tred® tri-rungs are slip-resistant and provide a wide flat standing surface. Fiberglass rails are non-conductive for working near electricity.

Lightweight - 25% lighter than standard 375lb extension ladders

BOXLOK™ Interlocking Rail System reduces deflection, twist, and sway for a more confident climbing experience

Solid Feel = More Confidence Reduced bounce, twist, and sway combined with wide rungs for premium climbing comfort

19-inch-wide clear width for stability

1.625 inch slip-resistant Traction-Tred® Tri-rungs

Rugged, heavy-duty extruded rung locks are spring-loaded to operate smoothly

Durable rail shield and shoe bracket protects rail from damage

Dual-action feet with slip-resistant pad and spur plate for use on hard or penetrable surfaces

Mar-Resistant Traction Caps™

Integrated Bubble Level to assist in the proper set

Smooth operating pulley with polypropylene rope

Ideal for utility and telecommunication industries

Vibrant green color for high visibility
