Product Description

DITCH WITCH C24X w/3' Deep / 6" Cut w/Trailer

POWER

A reliable 24-hp (17.9-KW) nHondas engine keeps the C24X performing for rental income you can count on, year after year.

CX TRACK DESIGN

Exclusive, patented CX Track design puts more track on the ground for better traction while increasing stability for better production. The shorter left track on the CX Track design allows for a more compact piece of equipment than competitive designs, offering more maneuverability in tighter spaces.

RELIABILITY

Robust, straightforward pivot design is maintenance-free and increases unit uptime. Greaseless sealed bearing design with construction-grade seals helps increase machine longevity. Standard outboard bearing support stabilizes the headshaft and auger, for reliable productivity trench after trench.

EASE OF USE

Redesigned easy-touch controls are smoother and lighter for less operator fatigue and increased machine responsiveness. Hydrostatic, skid steer style steering provides easier operation. The increased visibility of the workstation improves operator productivity. A simple, open design allows for quick, easy service access.

OPTIONS

An easy-to-operate backbit blade is much faster and less expensive than shovels, increasing productivity and rental revenue. Ditch Witch also offers the S3C Trailer, a single-axle design with a new rail system for easy loading and unloading of equipment of up to 3,500 lb (1,588 kg).

SUPERIOR CUSTOMER SUPPORT

Your Ditch Witch equipment is backed by a worldwide network of dealers you can count on for unmatched commitment to your success. From genuine Ditch Witch parts to factory-trained service to expert advice, your Ditch Witch dealer has it all for you.
