Product Description

Big Green Egg Caster Kit (2-inch) for Modular Nests and Wood Tables

The Big Green Egg 2-inch (5-centimeter) Caster Kit is a set of four swivel caster wheels designed for installation on all Big Green Egg EGG Tables, Nests, and intEGGrated Nest+Handlers. The kit includes two locking casters and two non-locking casters. When installed, the four casters replace the leveling feet on the base of the EGG table or nest and allow the entire cooking station to be rolled to a new position on a flat indoor or outdoor surface. The two locking casters hold the station stationary during cooking sessions, and the two non-locking casters provide smooth, uninhibited rolling when the station is being repositioned.

Two Locking, Two Non-Locking Casters

The caster kit's two-and-two configuration is a deliberate balance of mobility and control. Two locking casters are sufficient to hold a loaded EGG table or nest in a fixed position during cooking, as long as the casters are placed on a level surface and the locks are fully engaged. The two non-locking casters on the opposite corners allow the station to pivot and turn smoothly when being rolled, without the resistance that four locking casters would create when the locks are partially engaged. This configuration is standard across caster-equipped outdoor cooking equipment and provides reliable performance for routine repositioning operations.

2-Inch Diameter for Standard Applications

The 2-inch (5-centimeter) caster diameter is sized for smooth rolling on flat indoor and outdoor surfaces including tile, concrete, wood decking, and composite deck boards. At 2 inches, the casters are low-profile enough to maintain the original height of the EGG table or nest without significantly raising the cooking surface. The 2-inch diameter is appropriate for surfaces that are flat and level or have only minor irregularities. For surfaces with larger gaps, raised boards, or significant transitions, the 4-inch Caster Kit

provides better clearance over obstacles.

Universal Big Green Egg Compatibility

The 2-inch Caster Kit is compatible with the full range of Big Green Egg EGG Tables (Acacia and Modern Farmhouse formats), Modular Nest System EGG Frames and Expansion Frames, and all Big Green Egg Nest models. This universal compatibility makes the 2-inch Caster Kit the standard mobility upgrade for any Big Green Egg installation that currently uses leveling feet for height adjustment. The casters install in the same positions as the leveling feet they replace, requiring no drilling or permanent modification to the EGG table or nest frame.

Specifications

Caster diameter: 2 inches (5 centimeters). Set includes: 2 locking casters, 2 non-locking casters (4 casters total). Compatible with all Big Green Egg EGG Tables (Acacia and Modern Farmhouse), Modular Nest System EGG Frames and Expansion Frames, and all Big Green Egg Nest models. Replaces leveling feet. No permanent modification required for installation.

Adding Mobility to Your Modular Nest or Wood Table

The 2-inch caster kit is sized for use with Modular Nests and Big Green Egg wood tables. The smaller 2-inch wheel diameter is suited to smooth, flat outdoor surfaces like finished concrete, composite decking, and tile patios where rolling resistance is low. On these surfaces, the 2-inch casters provide easy repositioning of the entire EGG setup without requiring significant effort, even with a fully loaded Large or XL EGG in the nest.

Two Locking, Two Non-Locking

The kit includes two locking casters and two non-locking casters, designed to be installed at specific positions on the nest or table legs. The locking casters prevent movement once the setup is positioned for cooking, and the non-locking casters allow smooth rolling in the intended direction when repositioning. This combination gives you both the mobility to move the EGG easily and the stability to keep it stationary during a cook.

Straightforward Installation

The casters in this kit are designed to mount directly to compatible Modular Nest and wood table leg posts without specialized tools or modifications. Installation is a simple, one-time process that adds permanent mobility to your existing setup. Once installed, the casters operate reliably through years of outdoor use, contributing to the overall convenience and flexibility of your Big Green Egg cooking station.
