Product Description

Big Green Egg Nest for Medium EGG

The Big Green Egg Nest for the Medium EGG is a heavy-duty powder-coated steel stand that raises the Medium EGG to a comfortable cooking height and includes two locking casters for mobility and stability. Designed and manufactured in the USA exclusively for Big Green Egg, the Nest features a bracer bar for structural rigidity and supports the 114-pound Medium EGG through years of regular outdoor use. It is the cleanest and most straightforward base option for the Medium EGG, providing a stable floor-standing installation without the complexity of a Modular Nest station or acacia table.

USA Design and Manufacturing

Big Green Egg Nests are designed and manufactured in the USA specifically for Big Green Egg's ceramic EGG lineup. The Medium EGG Nest is engineered to the dimensions and weight requirements of the Medium EGG, providing a correctly sized opening for the EGG base, the appropriate cooking height, and the structural specifications needed for long-term safe use. USA manufacturing reflects Big Green Egg's quality control standards for a component that provides the primary support structure for a valuable ceramic cooking appliance.

Bracer Bar and Structural Rigidity

The bracer bar that spans the base frame of the Medium EGG Nest provides torsional rigidity that prevents the stand from racking or twisting under load. This is particularly important for a stand supporting a 114-pound ceramic appliance that generates substantial heat at its base during cooking. The bracer bar distributes stress evenly across the stand's frame and ensures that the EGG remains level and stable through repeated heating and cooling cycles and caster-based repositioning operations.

Two Locking Casters

Two locking casters allow the Medium EGG to be rolled to any position on a flat patio or deck surface and locked in place during cooking. The casters are rated for the combined weight of the Medium EGG and the

Nest through repeated repositioning cycles. The locking mechanism on each caster engages without tools and holds the Nest stationary reliably during high-temperature cooking sessions.

Compatible Accessories

The Medium EGG Nest accepts optional Acacia Wood EGG Mates (sold separately) on its side rails to add prep space adjacent to the EGG. The Nest Utility Rack (sold separately) can be attached to provide hanging storage for convEGGtors, grids, and other accessories.

Specifications

Material: heavy-duty powder-coated steel. Includes 2 locking casters and bracer bar. Compatible with Medium Big Green Egg (114 lbs / 52 kg). Designed and manufactured in the USA exclusively for Big Green Egg. Compatible with optional Acacia Wood EGG Mates and Nest Utility Rack (sold separately).

Stable Support for Everyday Cooking

The Medium Big Green Egg is one of the most versatile sizes in the lineup, suited to everyday family meals, weekend projects, and everything in between. The Nest for Medium EGG provides the stable, durable support structure that lets you use the Medium EGG with confidence through every cook. The welded steel construction holds the EGG securely at a comfortable working height, and the integrated casters make it easy to reposition the setup as needed without disassembly.

Casters for Easy Positioning

The included casters allow you to roll the Medium EGG and Nest to your preferred cooking spot on the patio or deck, then lock the wheels before lighting the fire. This combination of mobility and stability is particularly useful on covered patios or in outdoor kitchen spaces where the EGG shares space with other equipment and furniture. Roll it out to cook, roll it back to store, and lock it in place whenever the fire is going.

Designed for the Medium EGG

The Nest dimensions are matched specifically to the Medium EGG's footprint, ensuring a secure, properly supported fit. The Medium EGG sits correctly in the Nest cradle without any wobble or instability, keeping the ceramic body protected and the cooking experience safe and enjoyable. This purpose-built fit is one of the reasons Big Green Egg nests are recommended over generic stands for supporting EGG ceramics over the long term.
