Product Description

Big Green Egg Nest for XL EGG

The Big Green Egg Nest for the XL EGG is a heavy-duty powder-coated steel stand that raises the XL EGG to a comfortable cooking height and includes two locking casters for mobility and stability. Designed and manufactured in the USA exclusively for Big Green Egg, the XL Nest features a bracer bar for structural rigidity and is built to support the 219-pound XL EGG through years of regular outdoor cooking. It provides a stable, purpose-built floor-standing base for the XL EGG without the footprint or investment of a Modular Nest station, and it accepts optional EGG Mates and Nest Utility Rack accessories for expanded functionality.

Built for the XL EGG's Weight

The XL EGG Nest is constructed with structural dimensions appropriate for the 219-pound XL EGG. The heavy-duty powder-coated steel frame and bracer bar are sized to handle this load without flexing, racking, or showing structural fatigue over years of regular use in outdoor conditions. The powder-coat finish provides corrosion resistance on the steel components throughout the stand's outdoor service life. The two locking casters are rated for the combined weight of the XL EGG and Nest through repeated repositioning operations on flat patio and deck surfaces.

USA Design and Manufacturing

Big Green Egg Nests are designed and manufactured in the USA to specifications developed specifically for each EGG size. The XL Nest's opening dimensions, stand height, and structural specifications are engineered for the XL EGG rather than adapted from a generic stand. This precision fit ensures that the XL EGG sits securely in the Nest at the correct height and with the correct lateral support for safe use during high-temperature cooking sessions.

Compatible with EGG Mates and Nest Utility Rack

The XL Nest is compatible with optional Solid Acacia EGG Mates in the XL size (17.5 x 11 inch and 21 x 15 inch formats available separately). Mounting EGG Mates on the Nest's side rails creates a self-contained

outdoor cooking station with integrated prep surfaces sized for the XL's cooking output. The Nest Utility Rack (sold separately) can also be attached to the XL Nest for storing convEGGtors, cooking grids, and baking stones.

Specifications

Material: heavy-duty powder-coated steel. Includes 2 locking casters and bracer bar. Compatible with XL Big Green Egg (219 lbs / 99 kg). Designed and manufactured in the USA exclusively for Big Green Egg. Compatible with optional Acacia Wood EGG Mates and Nest Utility Rack (sold separately).

Supporting the XL EGG

The XL Big Green Egg carries substantial weight. The dense ceramic body, cast iron grate, stainless accessories, and charcoal load combine to make the XL one of the heaviest kamado grills in the consumer market. The Nest for XL EGG is built to handle that weight without compromise, providing a steel frame and cradle system that keeps the XL stable, secure, and at a practical working height for every session.

Casters for Practical Mobility

The two locking casters included with the Nest for XL EGG allow you to reposition this large, heavy setup with manageable effort. Roll the EGG to your preferred cooking location on the patio or deck, align it with your prep area, and lock the casters before firing it up. After the session, unlock the casters and move the EGG aside for patio cleaning or space reconfiguration. The casters make what would otherwise be a cumbersome, two-person job into a straightforward solo task.

A Permanent Part of Your Outdoor Setup

Once paired with the XL Big Green Egg, the Nest becomes a permanent component of your outdoor cooking station. Its heavy-duty construction is designed to match the longevity of the EGG itself, serving as a dependable base for years of high-capacity grilling, smoking, roasting, and baking. The investment in a properly designed nest pays for itself in the peace of mind and cooking confidence it provides with every use.
