Product Description

Big Green Egg Nest Utility Rack

The Big Green Egg Nest Utility Rack is a 304 stainless steel accessory rack that mounts to Big Green Egg Nests and intEGGrated Nest+Handlers to provide dedicated vertical storage for convEGGtors, cooking grids, and baking stones when not in use during a cooking session. The rack attaches via a clamp-on installation that requires no drilling or permanent modification to the Nest and is compatible with all Big Green Egg Nests and intEGGrated Nest+Handlers. Its two-slot design holds two large accessories securely in a vertical position, keeping them accessible and off the ground while maintaining a clean cooking area.

304 Stainless Steel Construction

The Nest Utility Rack is made from 304-grade stainless steel, the standard food-safe stainless alloy used in professional outdoor cooking equipment. Grade 304 provides excellent resistance to corrosion, moisture, and the acidic exposure that comes from proximity to cooking. The stainless construction is low-maintenance and does not require any surface treatment or periodic refinishing to maintain its appearance and corrosion resistance in outdoor conditions. The rack can be cleaned with standard stainless steel cleaning products or simply rinsed with water.

Clamp-On Installation

The Nest Utility Rack installs on any Big Green Egg Nest or intEGGrated Nest+Handler via a clamp mechanism that grips the Nest rail without drilling holes or permanently modifying the Nest structure. The clamp installation can be completed and removed without tools and does not leave marks or damage on the Nest rail surface. This means the Utility Rack can be added to an existing Nest at any time, moved to a different position on the Nest rail, or removed entirely without any lasting modification to the base Nest.

Two-Slot Design for Large Accessories

The Nest Utility Rack features two vertical slots sized to hold convEGGtors, cooking grids, and baking stones

in a secure, upright position. Storing these large accessories vertically in the Utility Rack prevents them from resting on the ground between uses, where they would accumulate dirt and debris and present a tripping hazard. Having the convEGGtor and a cooking grid immediately accessible on the Nest Utility Rack during a cooking session reduces the effort required to switch between direct and indirect cooking configurations, since the convEGGtor is always at hand and in a clean position.

Universal Nest and Handler Compatibility

The Nest Utility Rack is compatible with all Big Green Egg Nests (Small, Medium, Large, XL) and all intEGGrated Nest+Handlers (Medium, Large, XL, 2XL). This universal compatibility makes it a useful accessory regardless of which EGG size and base configuration an owner has. The clamp mechanism is designed to fit the rail profile used across all Nest and Nest+Handler sizes without size-specific adapters or hardware.

Specifications

Material: 304 stainless steel. Installation: clamp-on, no tools required, no permanent modification. Slots: 2 vertical slots for convEGGtors, cooking grids, and baking stones. Compatible with all Big Green Egg Nests (Small, Medium, Large, XL) and all intEGGrated Nest+Handlers (Medium, Large, XL, 2XL). Weather-resistant for permanent outdoor installation.

Keeping Your Cooking Station Organized

Outdoor cooking sessions generate clutter. Tongs, brushes, gloves, thermometers, and charcoal tools all need to live somewhere accessible during a cook. Without a dedicated rack, they end up balanced on the EGG, stacked on a side table, or set on the ground where they are easy to trip over or lose track of. The Nest Utility Rack solves this by providing a purpose-built hanging system attached directly to your nest or IntEGGrated Nest+Handler, keeping essential tools at hand and off surfaces where they create obstacles.

Compatible Across Multiple Nest Types

Because the Nest Utility Rack is designed to work with all Nest types including the IntEGGrated Nest+Handler, it serves as a versatile organizational upgrade regardless of which support system your EGG is mounted in. This compatibility makes it a practical addition to any Big Green Egg setup where tool organization during a cook is a priority.
