Product Description

Big Green Egg Solid Acacia EGG Mates 13.5-Inch for MiniMax

The Big Green Egg Solid Acacia EGG Mates 13.5-inch for the MiniMax are a set of two premium hardwood side tables that mount on the MiniMax EGG's Portable Nest or Carrier to provide a stable preparation surface adjacent to the compact ceramic kamado. Crafted from solid acacia wood with mortise and tenon joints, the Mates are finished to match the EGG handle and other acacia components in the Big Green Egg product line. At 13.5 inches, these Mates are sized proportionally for the MiniMax format and provide meaningful prep space without adding excessive width to the portable cooking setup.

Solid Acacia Wood with Mortise and Tenon Joints

Acacia wood is selected for EGG Mates because of its natural durability, moisture resistance, and hardness. The mortise and tenon joint construction used in the Mates is the traditional woodworking joint preferred for quality furniture and cabinet work, in which a projecting tenon fits precisely into a corresponding mortise socket to create a connection that resists lateral and torsional stress far better than fastener-only joints. This joint construction prevents the Mates from loosening or racking during transport and repeat assembly and disassembly cycles, and it ensures that the Mates remain dimensionally stable as the acacia wood goes through humidity and temperature cycling in outdoor conditions.

Compatibility with MiniMax Portable Nest and Carrier

The 13.5-inch EGG Mates are compatible with the MiniMax EGG when it is placed in its Portable Nest or Carrier. The Mates mount on the bracket positions provided by the Portable Nest's side rails, creating a three-part assembly of the Portable Nest, the MiniMax EGG, and two flanking acacia prep surfaces. This assembly turns the MiniMax into a self-contained cooking station with integrated work surfaces on both sides, which is particularly useful at outdoor events, tailgates, and campsites where no additional counter space is available. The Mates can also be folded down or removed for transport when the Portable Nest is being packed into a vehicle.

Matched Finish for Product Line Consistency

The 13.5-inch MiniMax Mates are finished to match the Big Green Egg handle and the larger Acacia Tables and Mates in the product line. A thin layer of protective oil on the acacia surface provides UV resistance that helps the wood retain its natural color and match the finish of other acacia components in the outdoor kitchen setup. This consistent finish is a deliberate design choice that ensures the Mates look like an integrated part of the MiniMax cooking station rather than an afterthought addition.

Set of Two

The 13.5-inch EGG Mates for MiniMax are sold as a set of two, providing symmetrical prep surfaces on both sides of the MiniMax EGG. Having Mates on both sides allows the cook to use the left Mate for raw ingredient staging and the right Mate for finished food resting, or any other two-sided workflow that takes advantage of the surface on each side of the EGG. The set of two also balances the visual appearance of the MiniMax cooking station, which would look asymmetrical with only one Mate installed.

Specifications

Material: solid acacia wood with mortise and tenon joints. Size: 13.5 inches. Compatible with MiniMax Big Green Egg in Portable Nest or Carrier. Sold as a set of 2. Finished to match EGG handle and Big Green Egg acacia product line. UV-resistant oil finish for outdoor use.

The Right Fit for the MiniMax

The 13.5-inch width of this EGG Mate is dimensioned specifically for the MiniMax EGG, ensuring a snug, stable fit without overhang or gap. The solid acacia surface provides a natural, warm aesthetic that complements the ceramic exterior of the MiniMax, and the hardwood construction holds up to the heat and moisture typical of an active cooking session. Oil periodically to maintain the finish and prevent surface drying.
