Product Description

Big Green Egg Solid Acacia EGG Mates 17.5 x 11 Inch for Medium EGG

The Big Green Egg Solid Acacia EGG Mates 17.5 by 11 inch for the Medium EGG are a set of two sustainably harvested acacia hardwood side tables that mount on the Medium EGG's Nest bracket positions, providing folding preparation surfaces on both sides of the EGG. The Mates are crafted from acacia with strong mortise and tenon joints, finished with a UV-protective oil to maintain color and resist weathering, and designed to match the finish of the EGG handle and other acacia components in the Big Green Egg product line. They fold up for compact storage when not needed and down to a horizontal working surface for cooking sessions.

Acacia Hardwood Durability

Acacia's natural density, oil content, and hardness make it well suited for outdoor cooking accessories that will be exposed to moisture, heat, and direct sunlight over years of use. The 17.5 by 11-inch surface of the Medium EGG Mates is composed of acacia slats joined with mortise and tenon construction, which provides a stable, flat surface that resists the seasonal expansion and contraction that causes gapped or warped surfaces in less durable wood species. The UV-protective oil finish on the surface helps the acacia retain its natural color by blocking the UV radiation that would otherwise oxidize the wood surface and cause fading.

Bracket and Mount System

The Medium EGG Mates come with brackets that allow them to mount on the Medium EGG Nest's side rail positions. The bracket system holds the Mates at a height level with the top of the Nest, creating a continuous work surface from the Mate's outer edge to the EGG's cooking grid. The brackets are secured without permanent modification to the Nest and can be removed if the Mates are no longer needed or if the cooking setup changes. The Mates fold up against the Nest rails when not in use, and the bracket keeps them in the folded position without additional hardware.

Set of Two for Symmetrical Coverage

The Medium EGG Mates are sold as a set of two, providing a matching pair for both sides of the Medium EGG Nest. Having both Mates installed gives the Medium EGG cooking station the appearance and functionality of a miniature outdoor kitchen, with prep surfaces flanking both sides of the EGG. Both Mates can be deployed for large cooking sessions and both folded for compact storage when the Nest is not in use.

Specifications

Material: sustainably harvested solid acacia wood with mortise and tenon joints. Dimensions: 17.5 inches x 11 inches (44 x 28 cm). Compatible with Medium Big Green Egg Nest. Sold as a set of 2. Includes mounting brackets. Folds up and down. UV-resistant oil finish.

Seamless Integration with Your Medium EGG

The EGG Mate is designed to connect directly to the side handle of your Medium Big Green Egg nest or IntEGGrated Nest+Handler, locking into position without tools and sitting flush against the EGG's exterior. This direct attachment eliminates the gap and instability common with freestanding side tables, keeping the work surface right where you need it during prep and plating.

Solid Acacia Construction

Acacia hardwood is chosen for its density, tight grain, and natural resistance to warping under outdoor conditions. The 17.5 x 11-inch surface of this EGG Mate provides enough space to hold a cutting board, platter, or a selection of tools and seasonings while cooking. The smooth-sanded finish is comfortable to work on and easy to wipe clean after each session.

Maintaining Your EGG Mate

Apply a food-safe hardwood oil before first use and repeat once or twice per season to keep the acacia surface hydrated and looking its best. Store under a protective cover or in a sheltered area during extended periods of non-use. With routine care, this EGG Mate will serve as a reliable, attractive companion to your Medium Big Green Egg for many seasons.
