### **Product Description**

#### **Big Green Egg Solid Acacia EGG Mates 21 x 15 Inch for XL EGG**

The Big Green Egg Solid Acacia EGG Mates 21 by 15 inch for the XL EGG are a set of two large-format sustainably harvested acacia hardwood side tables designed for the XL EGG's Nest bracket positions. At 21 by 15 inches per Mate, they provide a work surface that is proportional to the XL EGG's large cooking output, accommodating the volume of ingredients, tools, and finished food that a cooking session for 12 or more people requires. Mortise and tenon joint construction ensures structural integrity through repeated folding cycles, and a UV-resistant oil finish maintains the acacia surface's color and matches the other acacia components in the Big Green Egg product line.

#### **Surface Area for XL-Scale Cooking**

The XL Big Green Egg's 452-square-inch cooking surface handles 12 racks of ribs, 24 burgers, or 2 full turkeys simultaneously, and the logistics of managing this volume of food before and after cooking require substantial work surface adjacent to the EGG. At 21 by 15 inches, each Mate provides enough space for a full cutting board plus ingredient staging, and two deployed Mates create 42 inches of combined flanking work surface that is meaningfully more useful than the 17.5-inch standard Mates for XL-scale cooking sessions. For cooks who use the XL EGG regularly for large groups, the 21 by 15-inch format is the appropriate Mate size.

#### **Acacia Wood and Joint Quality**

The sustainably harvested acacia used in these Mates is the same material and sourcing standard as all Big Green Egg EGG Mates. The natural density and oil content of acacia wood make it resistant to the moisture, heat exposure, and UV radiation present in outdoor cooking environments. The mortise and tenon joints used in the 21 by 15-inch Mates are cut to the same standards as those in the smaller Mate formats, providing durable, rattle-free connections that maintain flatness and stability through years of fold cycling in outdoor conditions.

## Specifications

Material: sustainably harvested solid acacia wood with mortise and tenon joints. Dimensions: 21 inches x 15 inches (53 x 38 cm). Compatible with XL Big Green Egg Nest. Sold as a set of 2. Finished to match Big Green Egg acacia product line. UV-resistant oil finish.

## Expanded Prep and Staging Area

The 21 x 15-inch surface of this EGG Mate is the largest in the EGG Mate lineup, and for XL EGG owners cooking at scale, that size matters. When you are managing a full brisket, a rack of ribs, or multiple chickens, having a large, stable surface immediately adjacent to the EGG makes the cook more organized and efficient. Marinades, rubs, carving boards, and serving platters all have a dedicated spot within arm's reach of the grill.

## Built from Solid Acacia Hardwood

Solid acacia hardwood is one of the better choices for outdoor cooking surfaces because of its natural density, tight grain, and visual appeal. Acacia resists warping and surface checking better than many softwoods, and it holds up well to the moisture and temperature variation common in outdoor cooking environments. The smooth, sanded finish is comfortable to work on and provides a clean surface for food contact tasks like slicing, arranging, and plating.

## Direct Attachment to Your XL Nest

This EGG Mate is designed to attach directly to the handle of your XL Big Green Egg nest or IntEGGrated Nest+Handler. The connection is secure and tool-free, locking the EGG Mate in place so it does not shift during use. When you are done, detachment is equally simple. This design keeps the cooking station clean and compact when the EGG Mate is not needed, and puts it exactly where it should be when it is.

## Care Instructions

Apply a food-safe hardwood finishing oil before first use and repeat at the start of each season or whenever the surface appears dry. Store in a sheltered location or under a protective cover during extended non-use periods. With this basic maintenance routine, the acacia surface stays hydrated, attractive, and ready for use whenever you fire up your XL Big Green Egg.
