Product Description

Big Green Egg Solid Acacia Hardwood Table for XL EGG

The Big Green Egg Solid Acacia Hardwood Table for the XL Egg is a handcrafted outdoor kitchen table built from solid planks of genuine acacia hardwood, sized for the XL Big Green Egg. Each table is assembled from naturally shaped acacia planks with unique grain patterns and color variations, so every table is one of a kind. The Acacia Table creates a complete outdoor cooking station around the XL EGG with substantial counter space for ingredients, tools, and serving. The EGG sits in the table's center opening on a Table Nest (sold separately), which ensures proper airflow beneath the EGG and protects the wood surface from the heat generated during cooking.

Acacia Hardwood at the XL Scale

Acacia is among the hardest and most durable hardwood species used in outdoor furniture applications. Its natural density gives it excellent resistance to moisture, warping, and surface wear. The XL Acacia Table uses solid acacia planks throughout, not laminated or engineered wood, which ensures structural integrity and a consistent appearance as the wood weathers over years of outdoor use. The natural grain and color variation unique to each plank of acacia mean that the XL Acacia Table looks handcrafted and individual rather than mass-produced. The table's size is proportional to the XL EGG, providing generous counter space on all sides to support the larger-volume cooking sessions the XL EGG is designed for.

Table Nest Requirement

The Table Nest for XL EGG (sold separately) is required for any installation of the XL EGG in the Acacia Table. The Table Nest elevates the EGG to the correct height above the table surface, creates the airflow gap between the EGG base and the wood below, and ensures that the bottom draft door remains accessible for temperature control. Installing the XL EGG directly on the wood table surface without a Table Nest is unsafe and damages the table surface through heat transfer from the EGG base. The Table Nest is the component that makes the acacia wood table a safe installation for the XL EGG.

Counter Space for Large-Group Cooking

The XL Acacia Table surrounds the XL EGG with solid wood counter space suited to the demands of large-group cooking. The XL EGG's 452-square-inch cooking surface produces output for 12 or more people per session, and the table space around it accommodates the corresponding volume of ingredients, tools, and finished food during an extended cooking session. The Acacia Table creates a cohesive outdoor kitchen workspace rather than a standalone grill with separate side tables, and its warm wood aesthetic integrates naturally with outdoor furniture and landscaping.

Caster Compatibility and Care

The XL Acacia Table is compatible with the Big Green Egg Caster Kit for mobility on flat patio surfaces. The table benefits from periodic treatment with a food-safe wood oil to maintain the acacia surface's resistance to weathering and UV exposure. Cleaning with a damp cloth between sessions and covering when not in use extends the life of the finish and reduces the frequency of maintenance treatments required.

Specifications

Material: solid acacia hardwood planks. Designed for the XL Big Green Egg. Requires Table Nest for XL EGG (sold separately). Compatible with Big Green Egg Caster Kits (sold separately). Each table features unique natural grain and color variation. Finished to protect against UV light and moisture.

Long-Term Care and Finishing

Solid acacia hardwood requires periodic oiling to maintain its rich color and surface integrity. Applying a food-safe hardwood oil once or twice per season keeps the wood hydrated, prevents surface cracking, and restores the warm golden-brown tones that distinguish acacia from lesser tabletop materials. When not in use during off-season months, storing the table under a protective cover or in a sheltered area will extend the life of the finish. With straightforward care, the acacia surface continues to serve as both a functional worksurface and a handsome centerpiece of your outdoor cooking setup for many years.
