Product Description

Big Green Egg Tool Hook for Modular Nest System

The Big Green Egg Tool Hook for the Modular Nest System is a powder-coated aluminum accessory hook designed to add additional tool hanging positions to any Modular Nest EGG Frame or Expansion Frame, or to compatible Big Green Egg Acacia Tables. The hook provides a dedicated hanging point for a Grid Gripper, Ash Tool, tong, spatula, or any other accessory that benefits from being kept within immediate reach during cooking. It is precision-engineered from durable powder-coated aluminum and attaches to the Modular Nest System or Acacia Table frame rail without permanent modification.

Powder-Coated Aluminum Construction

The Tool Hook is constructed from powder-coated aluminum, which provides corrosion resistance and weather durability appropriate for permanent outdoor installation in proximity to the EGG. The aluminum construction keeps the hook lightweight while maintaining the structural rigidity needed to hold grilling tools and accessories securely without bending or flexing under load. The powder-coat finish matches the finish used on other Modular Nest System components and provides a consistent visual appearance when the hook is installed on an EGG Frame or Expansion Frame.

Dimensions and Weight

The Tool Hook measures 3.5 by 2.5 by 1.5 inches (8.9 by 6.4 by 3.8 centimeters) and weighs 0.2 pounds (0.09 kilograms). Its compact footprint allows multiple Tool Hooks to be installed along the same frame rail without interfering with each other or with the EGG Frames and Expansion Frames. The hook profile is designed to hold the standard accessories in the Big Green Egg product line securely without requiring clips or fasteners on the accessory being hung.

Compatibility with Modular Nest and Acacia Tables

The Tool Hook is compatible with the Big Green Egg Modular Nest System's EGG Frames and Expansion Frames and also works with the frame rails of Big Green Egg Acacia Tables. This dual compatibility makes the Tool Hook a useful addition regardless of whether the owner has a Modular Nest setup or a traditional Acacia Table installation. In both cases, the Tool Hook adds a hanging position for accessories that would otherwise have to rest on the counter surface or be set on the patio during cooking.

Adding Tool Positions to Existing Setups

The EGG Frames in the Modular Nest System include integrated tool hooks as a standard feature, but the number of included hooks may not be sufficient for owners who use a large number of accessories during their cooking sessions. Adding individual Tool Hooks at additional positions along the Modular Nest frame allows the cooking station to accommodate a full set of grilling tools, thermometers, and other hanging accessories without requiring any item to be set down on the counter surface. For Acacia Table owners who want to add tool organization to their installation, the Tool Hook provides a compatible solution that mounts without drilling or permanent modification.

Specifications

Material: powder-coated aluminum. Dimensions: 3.5 x 2.5 x 1.5 inches (8.9 x 6.4 x 3.8 cm). Weight: 0.2 lbs (0.09 kg). Compatible with Big Green Egg Modular Nest System EGG Frames and Expansion Frames. Compatible with Big Green Egg Acacia Tables. No permanent modification required for installation.

Organization Makes a Better Cook

The difference between a well-organized cooking station and a cluttered one shows up in every session. When your tools are hung within reach, you spend more time focused on the food and less time searching for what you need. The Tool Hook for Modular Nest System brings this organizational benefit to any Big Green Egg Modular Nest setup, giving each of your most-used accessories a dedicated, accessible home. Whether it is tongs, a grill brush, a spatula, or a leather glove, the Tool Hook keeps it right where you need it during the cook.

The Tool Hook also works with Acacia Tables, extending its compatibility beyond the Modular Nest System for those who use Big Green Egg's solid wood table configurations. This versatility makes it a useful addition regardless of which table or nest system supports your EGG.
